## Features & advantages

Lil Bot is a multitask chat bot made specially for e-commerce websites.

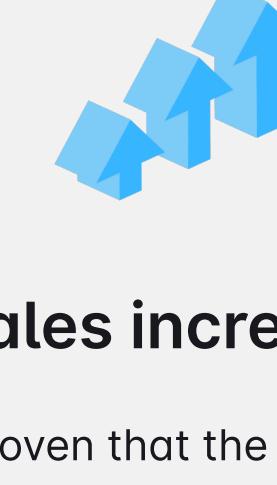

### Modern AI

Lil Bot was built with the latest technologies and has a strong and powerful AI.

### Target technology

Lil Bot disposes of a targeting system which identifies the customer's personality.

### Full time technical support

If our partners experience a problem with our product, we provide a full-time technical support to help them resolve it.

### Better customer satisfaction

Lil bot was designed to make the customer journey easier and faster, by making choices for them.

### Gain of profit

Since Lil Bot is able to find the best item for each customer, it has been proven that the price of the product is less important for the customer if Lil Bot chooses it.

### Sales increase

It has been proven that the add-on of Lil Bot on a e-commerce website results in a major sales increase.

## Partner stories

Get inspired by some of our partner's opinion.

CADEAUX.COM

“ People spend a lot of time searching for a gift on our website, and they often give up. The acquisition of Lil bot allowed us to ease and speed our costumer experience.

**Arnoud Fournier**  
President, cadeaux.com

### SHEIN

“ Lil bot has helped me a lot in the development of my business. It was able to guide my customers to buy a greater diversity of my products, facilitating my orders with my suppliers.

**Chris Xu**  
CEO, Shein

“ This chatbot has changed the way our customers shop. It advises them the products that best meet their expectations without bringing an additional workload.

**Enrique Martinez**  
CEO, Fnac
